Soviet General Purpose Naval Force Deployment Levels
In the Mediterranean Sea and Indian Ocean, 1968-1973*

I. High, Average and Low Deployment Levels of Soviet
Naval Forces

A. Mediterranean Sea

The dramatic buildup of the Soviet
Mediterranean Squadron which began in 1964, and
was stimulated in great part by the Arab-Israeli
war of 1967, continued through 1971 when the
size of the squadron stabilized at an average
level of about 50 units. This force has fluc-
tuated in size due to normal rotating or the
deployment of additional ships during a crisis.
During the Yom Kippur War in the final quarter
of 1973, the Soviet naval force there tempor-
arily increased to an all time high of 94
general purpose units. Following the war, the
Soviet deployment level in the Mediterranean
has gradually returned to about the same level
as that of two years ago.

The following graphs illustrate the
development of the Soviet Mediterranean Squadron
since 1968. This development is first expressed
in the conventional ship-days format. Then it
is portrayed in terms of high, average, and low
deployment levels: High--the largest number of
surface combatants, submarines, and support
ships present at any one time during the year;

---

* General purpose force deployments do not include
ballistic missile submarine, oceanographic, and
space support operations.

25X1

Average--the average number of surface com-
batants, submarines and support ships present
during the year, rather than the average of the
high and low figures; and Low--the smallest
number of surface combatants, submarines, and
support ships present at any one time during
the year.

B.    Indian Ocean

The Soviet naval presence in the Indian
Ocean began in March 1968 with the deployment
of a goodwill contingent of four ships.  Good-
will visits continued as a principal objective
of Soviet operations in the Indian Ocean until
1970 and the average Soviet naval force level
there continued to gradually increase.

There was a general slump in Indian Ocean
deployment levels from the conclusion of exercise
"Ocean" in the spring of 1970 until the outbreak
of the India-Pakistan War in December 1971.
During the crisis the Soviet naval force in the
Indian Ocean had reached a total of 22 units,
45 percent of which were major combatants and
submarines.  Although units of this force departed
the Indian Ocean by late February and early March
of 1972, the total number of Soviet ships in the
Indian Ocean did not markedly decrease.  This
was because the Soviets sent eleven ships to
Bangladesh to assist in harbor clearing opera-
tions.  These operations included up to six
minesweepers and ten miscellaneous auxiliaries.
The presence of these harbor clearing units con-
tributed to a 1972 high of 23 general purpose
naval units in the Indian Ocean.  Of these,
however, only 13 percent were major combatants
and submarines, whereas 30 percent were mine-
sweepers and 57 percent were auxiliaries.  Since
the mine removal craft in Bangladesh were small
and not directly involved in the Soviet naval
"presence" elsewhere in the Indian Ocean, they
have been frequently excluded from the totals
of Soviet deployments in the Indian Ocean.

-4-

During October 1972, the Soviets began work
to set up a naval support facility in Berbera,
Somalia. A combination barracks and repair ship
was moored there and used to support the con-
struction of the improved port facilities, a
Soviet naval communications station, and
reportedly a military airfield. Other Soviet
warships were in Berbera on a routine basis.

The fluctuations of Soviet naval forces in
the Indian Ocean appear to be directly related
to US naval initiatives during various crises.
During both the India-Pakistan war of 1971 and
the recent Yom Kippur War, Soviet naval units
entered these waters after major US carrier
task forces had been deployed there. In 1973,
the aggregate number of Soviet naval units in
the Indian Ocean reached a new high in response
to the deployment of the USS Hancock and a
carrier task force there in late October. In
December 1973, when the Soviet augmentation of
their Indian Ocean naval force was complete, a
peak of 30 general purpose naval units was
reached. Of the 30 units counted in the high,
10-12 units were already in the Indian Ocean
conducting long term special operations in
Bangladesh or Somalia. Only ten units of the
total force were major combatants or submarines--
the same number of major combatants and sub-
marines present during the India-Pakistan War.

Soviet naval activity in the Persian Gulf
has involved only a small part of the force
deployed in the Indian Ocean. The Soviets have
yet to conduct a naval exercise in the Persian

-5-

Gulf, and only one tenth of the Indian Ocean
port calls are conducted in the Persian Gulf.

The following graphs illustrate the growth
of Soviet naval deployments to the Indian Ocean
since 1968:

Normal Profiles* of
Deployed Soviet Naval Forces

A.  Mediterranean Sea   During the past year, the

    normal profile of the Soviet Mediterranean

    Squadron has been some 19 surface combatants,

    12 submarines, and 24 auxiliaries.  The surface

    combatant portion of this force normally

    included two cruisers or surface-to-surface

    missile equipped ships, four surface-to-air

    missile equipped destroyers, eight gun-armed

    destroyer or destroyer-escort size units, two

    mine craft, and three amphibious ships.  The

    submarine contingent usually included one or

    two nuclear powered attack units of either the

    C or V class and eight to ten diesel powered

    attack submarines of which one was usually a

    cruise missile unit.  The auxiliary force

    normally included 17 miscellaneous auxiliary

    support units, three naval-associated merchant

    tankers, and three intelligence collectors.

---

*  Excludes ships responding to the Yom Kippur War
crisis and those present during normal rotation of
units.

25X1

B.  <u>Indian Ocean</u>  In 1973 the normal profile of
Soviet naval units conducting routine operations
in the Indian Ocean was one gun-armed cruiser or
missile equipped ship, two destroyer or destroyer-
escort sized units, one minecraft, one amphibious
ship, a diesel submarine, and six auxiliary
support ships (including one naval-associated
merchant tanker).  The two escorts appear to be
based in the Indian Ocean.

In addition last year, there were normally
11 other Soviet naval units in the Indian Ocean
conducting special operations.  These units
included a combination barracks and repair
barge at Berbera, Somalia, and a force of
three minecraft and seven miscellaneous auxili-
aries conducting salvage operations in Bangladesh.

25X1

The following tabulation summarizes Soviet port visits in the Mediterranean Sea since 1968. During this period, port visits in the UAR accounted for over 85 percent of the total for the Mediterranean as a whole and port visits in Syria made up most of the remainder.

### Soviet Port Visits in the Mediterranean Sea*

|  | 1968 | 1969 | 1970 | 1971 | 1972 | 1973** |
|---|---|---|---|---|---|---|
| Algeria | 16 | 17 | 19 | 21 | 23 | 24 |
| France | 0 | 0 | 4 | 2 | 1 | 3 |
| Italy | 2 | 5 | 5 | 3 | 2 | 9 |
| Libya | 0 | 1 | 0 | 0 | 0 | 0 |
| Morocco | 0 | 0 | 0 | 0 | 0 | 13 |
| Syria | 35 | 40 | 36 | 25 | 51 | 45 |
| Tunisia | 0 | 3 | 0 | 2 | 2 | 0 |
| UAR | 136 | 504 | 522 | 499 | 335 | — |
| Yugoslavia | 17 | 9 | 3 | 6 | 6 | 11 |
| TOTALS | 206 | 576 | 589 | 506 | 420 | — |

* The totals reflect every entry of each Soviet naval ship into a foreign port but do not reflect the duration of the visits which varied from one day to over 18 months. Port calls by oceanographic research and space event support ships are included in the totals because the data available for 1968 through 1971 are not broken down by ship type.

** Soviet port visits in Egypt have not yet been totalled, although Soviet ships were in Alexandria, Port Said and Mersa Matruh on a virtually continuous basis through 1973.

25X1

The following table depicts the pattern of Soviet port visits in the Indian Ocean region since 1968. The large increase in visits to Somalia since 1971 reflects the USSR's development and use of the port of Berbera for naval support. Most of the remaining port visits in the Indian Ocean—particularly those by combatants—were undertaken for diplomatic purposes.

### Soviet Port Visits in the Indian Ocean*

|  | 1968 | 1969 | 1970 | 1971 | 1972 | 1973 |
|---|---|---|---|---|---|---|
| Ethiopia | 0 | 1 | 1 | 1 | 1 | 1 |

| Iran | 3 | 7 | 0 | 2 | 2 | 0 |
| Iraq | 3 | 8 | 2 | 11 | 14 | 16 |
| Kenya | 5 | 0 | 3 | 0 | 2 | 4 |
| Kuwait | 0 | 1 | 0 | 0 | 0 | 0 |
| Malagasy Republic | 0 | 1 | 0 | 0 | 0 | 0 |
| Maldives | 1 | 1 | 0 | 1 | 0 | 1 |
| Mauritius | 2 | 4 | 17 | 5 | 20 | 11 |
| Pakistan | 2 | 2 | 2 | 0 | 0 | 0 |
| Seychelles Islands | 0 | 0 | 0 | 0 | 3 | 0 |
| Somalia | 3 | 13 | 18 | 11 | 38 | 97 |
| South Yemen | 4 | 13 | 7 | 13 | 12 | 7 |
| Sri Lanka | 4 | 8 | 2 | 2 | 14 | 9 |
| Sudan | 0 | 2 | 0 | 2 | 0 | 0 |
| Tanzania | 4 | 2 | 2 | 0 | 0 | 0 |
| UAR | 3 | 1 | 0 | 0 | 0 | 0 |
| Yemen | 0 | 2 | 3 | 0 | 0 | 0 |
| TOTALS | 42 | 68 | 63 | 49 | 110 | 153 |

* The totals reflect every entry of each Soviet naval ship into a foreign port but do not reflect the duration of the visits which varied from one day to 18 months. Port calls by oceanographic research and space event support ships are included in the totals because the data available for 1968 through 1971 are not categorized by ship. Singapore is not included in the table because it is a Pacific Ocean port. However, Soviet ships from the Indian Ocean occasionally call there and Soviet naval auxiliaries are overhauled in Singapore's shipyards.

-11-
